

6V: Anatomska građa antere prašnika i plodnika tučka

PREPARATI:

- 1) Anatomska građa antere prašnika (liljan, *Lilium* sp.)
- 2) Anatomska građa plodnika tučka (krompir, *Solanum tuberosum*)

Mijat Božović

BOTANIKA

materijal za laboratorijske vježbe

1) Anatomna građa antere prašnika

liljan
(*Lilium* sp.)

Djelovi antere i građa zida

presjek kroz anteru prašnika ljiljana

konektiv

provodni snopić

poluantera

polenova kesa

presjek kroz polenovu kesu prašnika ljiljana

međusloj

endotecijum

epidermis

polenova zrna

tapetum

2) Anatomska građa plodnika tučka

- zid plodnika
- sjemeni zameci
- septa
- placenta

Sjemeni zametak

presjek kroz plodnik tučka krompira

mezofil →

embrionova
kesa

nucelus

integument sa
mikropilom

halaza →

funikulus

placenta

provodni snopić

epidermis

DODATAK:

- 1) Cvijet ljiljana: poprečni presjek i djelovi cvijeta**
- 2) Djelovi antere i slojevi zida**

1) Cvijet ljiljana: poprečni presjek i djelovi cvijeta

A: unutrašnji listići perijanta; B: spoljašnji listići perijanta; C: plodnik tučka; D: anthera prašnika; E: prašnički konac; F: polenova kesa

2) Djelovi antere i slojevi zida
